## **Journals currently indexed at the RIBA Library**

The journals we index are assigned one of three levels of importance, based on professional assessment of the journals, their importance within the library's collections, and their relevance to readers' requirements.

'Priority 1' and 'Priority 2' journals represent what are felt to be the most important and representative journals from their countries. We aim to index 'Priority 1' journals within one month of receipt in the library, and we aim to index 'Priority 2' journals within the quarter of receipt. The remainder of the journals selected for indexing are done as and when we can.

As far as possible, it is intended that all the previous year's journals are indexed by the Autumn of the following year. Please be aware that sometimes delays to publication or supply can affect these timings.
