INTERNATIONAL PARTNERSHIPS

The University of L'Aquila is constantly working to develop its international dimension, establishing and developing networks and partnerships that guarantee the opportunity of cooperation with regard to education, research and relations with industry.

INTERNATIONAL DEGREE COURSES

One of the main objectives of the University of L'Aquila is the internationalization of teaching pursued through student and teacher mobility, international degree courses offered in collaboration with foreign universities, together with entire degree courses offered in English.

Provide double, multiple or joint Degrees

- Civil Engineering
- Business Administration, Economics and Finance
- Computer and Systems Engineering
- Computer Science
- Mathematical Engineering
- Mathematical Modelling
- Mathematics
- Telecommunications Engineering
- Environmental Biology and Management of Ecosystems
- Physics

Delivered in English

- Applied Data Science
- Atmospheric Science and Technology

INTERNATIONAL STUDENT MOBILITY

➤ Erasmus+ Programme KA1

EU funded mobility programme allowing you to spend between two and twelve months at a European or non European university.

➤ Joint degrees or double/multiple degrees

Offered in English and/or Italian, these courses, in accordance with agreements stipulated, provide integrated curricula and student mobility strategies allowing for the reciprocal recognition of the credits earned within the course. Graduates obtain a double or multiple degree (from the two or more universities taking part in the agreement in which the student has earned required credits) or a joint degree (a single degree issued by the universities who have officially agreed upon and established a joint international degree course).

➤ International agreements

Between the University of L'Aquila and EU or non-EU countries' universities, they are another means of internationalizing and promoting teaching and research on an international level.

Erasmus+ Partners: more than

150 European

30 non European
Institutions

Institutional Partners:

60 bilateral
agreements
with EU and
non-EU universities

10 international
degree
programmes

20 agreements
for structured
mobility

Participation in International Schools:

International School of Space Science

International Summer School on Atmospheric and Oceanic Sciences

Participation in other EU Programmes:

tens of Cooperation and Research Projects within HORIZON 2020 and
ERASMUS+: INTERNATIONAL CREDIT MOBILITY, CAPACITY BUILDING HE,
STRATEGIC PARTNERSHIPS

several projects in support of territorial development

Brand new!!!

Blended Mobility

The Erasmus+ programme for the period 2021-2027 has added new opportunities to the existing mobility activities, in order to enhance **flexibility, accessibility** and **relevance** of the mobility experience.

As a rule, any mobility that was previously an exclusively physical mobility can now be organised as a **combination** of a **physical mobility abroad** and of a **learning period online** either before or after the physical part.

Two possible scenarios of blended mobility:

1. **Long-term physical presence abroad:** minimum 2 months physical presence abroad complemented by any volume of virtual learning before or after the physical mobility (for students on study mobility or traineeship mobility)
2. **Short-term physical presence abroad:** minimum 5 days and a maximum of 30 days abroad complemented by any volume of virtual learning before or after the physical mobility (for students on study mobility or traineeships)

Which requirements apply?

Blended mobility is planned from the beginning, prior to start of your activity abroad.

The virtual component can be planned either before or after the physical part.

The physical part (abroad) should have a minimum duration: 2 months for long-term mobility; 5 days for short-term mobility.

The short-term student mobility should be taken up in particular by those students who cannot go on a long-term physical mobility.

The University will assess the appropriateness of such a choice and make sure that long-term physical mobilities remain the norm.

WELFARE AND SUPPORT

The wellbeing of our students is very important to us

We have a well-developed network of support services to help and guide you during your time here.

The **International office** assists you during the selection and before your departure or arrival, providing information on needed documents, and supporting you for administrative procedures.

The Association **AQUILASMUS** supports you for all the practicalities and during your stay, organises several cultural and leisure events.

AQUILASMUS is the local branch of ESN, the Erasmus Student Network, the only official Erasmus network in Europe. It is present in more than 430 Higher Education Institutions from 37 countries with around 13500 active members. It is a NO-PROFIT association composed of voluntary students (mainly former erasmus as well) who help and entertain the Erasmus students!
