

VII International Congress Valorisation and Recycling of Industrial Waste

L'Aquila, Italy 21th - 23th September, 2009

<http://www.varirei.ing.univaq.it>

Zordan Congress Center

Organising Committee
Prof. Mario Pelino - President
Prof. Francesco Vegliò - Secretary & Treasurer
Faculty of Engineering -
Department of Chemistry, Chemical Engineering & Materials
University of L'Aquila - ITALY

TOPICS OF THE CONGRESS

- Processes and technologies to minimize and valorize industrial waste
- Advanced technologies for recovery, dismantling, sorting, recycling of : plastics, metals, paper, glasses, batteries, WEEE.
- New materials and products obtained from industrial waste
- Energy from waste, GHG reduction and capture
- Waste management – contaminated soils and environmental impact
- Processes and technologies of waste water recycling
- Inert and demolition waste: scientific investigation, norms, technology and revaluation possibilities
- Sustainable manufacturing in the eco-factory: towards zero waste and LCA of processes and products
- Evolution of the norms and regulations for waste management.

AIM of VARIREI 2009

is representing a point of encounter between Academia, Research Bodies and Industries

by

- Facing all aspects connected to the production of wastes coming from the industry.
- Presenting the latest and emerging technologies of treatment, valorisation and recycling of the wastes.
- Examining the environmental impact coming from the waste treatments.

FORMAT OF THE PAPERS

The space containing the complete text (italian or english), including drawings and tables, must be limited to a central block size 12x20. **Do not present more than 8 pages.** Use the times new roman character type, body 12, space 1.
