WPCTF is back. The 3rd edition of the cybersecurity challenge, loved by young talents, is around the corner

Würth Phoenix Capture The Flag (WP CTF) is a cybersecurity competition designed to promote information security, develop participants' skills and raise awareness about the importance of protecting information systems. Following the success of the first two editions, we are excited to announce **the third edition of WP CTF**, which will take place on **November 23, 2024**.

The event offers an innovative approach to attract students, spark curiosity and promote enjoyment. The competition lasts 8 hours, during which participants are provided with all necessary resources and can enjoy breaks and snacks until the awards ceremony, thanks to the support of our valued sponsors.

The goal of the competition is to identify and capture flags, which means finding and resolving hidden software vulnerabilities in a webapp developed by Würth Phoenix's DevOps and cybersecurity teams.

The winning team is the one that captures the most flags in the shortest time. The prizes include Amazon vouchers worth 3.000, 2.000 and 1.000 euros for the top three teams.

Awards Ceremony 2023: First Prize Sponsored by Volksbank
