

UNIVERSITÀ DEGLI STUDI DELL'AQUILA

AMMINISTRAZIONE CENTRALE
AREA GESTIONE DELLE RISORSE UMANE
SETTORE CONCORSI E SELEZIONI

Concorso pubblico, per esami, indetto con D.D.G. n. 665 – 2023 del 6.09.2023, pubblicato sul portale InPA in pari data, per n. 2 posti di Categoria D, p.e. D1 – Area Amministrativa-gestionale con rapporto di lavoro subordinato a tempo pieno e indeterminato da assegnare all'Area Ricerca e Trasferimento Tecnologico dell'Università degli Studi dell'Aquila

TRACCE DELLA PROVA ORALE

BUSTA 1

1. Lo Spin Off “Accademico” ai sensi del *Regolamento per la costituzione di Spin Off dell'Università degli Studi dell'Aquila e la partecipazione del personale universitario alle attività dello stesso*
2. Il MTA (Material Transfer Agreement)
3. Leggere e tradurre:
“The R&I ecosystem has profoundly changed since Recommendation 2008/416/EC, which was mainly aimed at public research organisations. An update is needed, to focus on maximising the value of all knowledge assets generated by different types of actors in a dynamic R&I ecosystem. New challenges and developments should be addressed, such as increasingly complex knowledge value-chains, new market opportunities created by emerging technologies, new forms of collaboration between industry and academia and between public sector and academia, involvement of citizens, as well as R&I foreign interference and reciprocity in the management of intellectual assets in the context of international R&I cooperation.” *(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)*
4. Come si esegue una somma dei dati presenti in una colonna in un foglio di calcolo?

BUSTA 2

1. Lo Spin Off “Universitario” ai sensi del *Regolamento per la costituzione di Spin Off dell’Università degli Studi dell’Aquila e la partecipazione del personale universitario alle attività dello stesso*
2. L’accordo di partenariato
3. Leggere e tradurre:
“Open Science, which is an approach to the scientific process based on open cooperative work, tools and diffusing knowledge, as defined in Regulation (EU) 2021/695 of the European Parliament and of the Council, is a standard method for working under the Union framework programmes for R&I and is identified as another priority area for joint action in Recommendation (EU) 2021/2122. Commission Recommendation (EU) 2018/790 encourages Member States to set and implement national policies for dissemination of and open access to scientific publications and for the management of research data, in particular through the European Open Science Cloud. The final report of the Open Science Policy Platform lists boosting awareness of the value of IP and management of IP assets among the elements that a shared research system for innovation should include. The Council conclusions of 10 June 2022 on ‘Research assessment and implementation of Open Science’ suggest that the evolution of the research assessment systems in Europe should take, inter alia, knowledge valorisation into consideration.” *(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)*
4. Come si organizza una riunione in modalità remota?

BUSTA 3

1. La Commissione Spin Off ai sensi del *Regolamento per la costituzione di Spin Off dell'Università degli Studi dell'Aquila e la partecipazione del personale universitario alle attività dello stesso*
2. Il contratto di cessione dei diritti di proprietà industriale
3. Leggere e tradurre:
“The guiding principles should be non-binding. Their application should respect international, Union and national law and they should be taken into account in efforts to make the Union legal framework supportive of knowledge valorisation. The guiding principles should be applied with the intention of the broadest possible societal use, including contribution to sustainable society in accordance with the Union guidelines for tackling R&I foreign interference. Where possible and depending on the context, valorisation activities should consider the needs of and the benefits for society, besides traditional profit drivers. One example is socially responsible licensing, where the licensing of intellectual assets should ensure that the price-setting of the final products and services does not undermine accessibility. The guiding principles should focus on maximising the value of R&I investments beyond traditional knowledge transfer and on involving all actors in the R&I ecosystem.”
(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)
4. Quali applicativi potrebbero essere utilizzati per preparare una relazione finale di un progetto di ricerca?

BUSTA 4

1. Proprietà intellettuale ed industriale nell'ambito del *Regolamento per la costituzione di Spin Off dell'Università degli Studi dell'Aquila e la partecipazione del personale universitario alle attività dello stesso*
2. Il contratto di licenza dei diritti di proprietà industriale
3. Leggere e tradurre:
"Knowledge valorisation" is the process of creating social and economic value from knowledge by linking different areas and sectors and by transforming data, know-how and research results into sustainable products, services, solutions and knowledge-based policies that benefit society. Focusing on knowledge valorisation makes it necessary to broaden the scope of Recommendation 2008/416/EC to encompass the entire R&I ecosystem and its increasingly diverse range of actors. Knowledge valorisation is a paradigm shift, bringing in new aspects that will maximise the value of existing and future R&I and of knowledge assets including tacit knowledge, tacit knowledge being any knowledge that cannot be codified and transmitted as information through documentation, academic papers, lectures, conferences or other communication channels." (from *COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation*)
4. Quale applicativo potrebbe essere utilizzato per la preparazione di un prospetto di budget per la presentazione di un progetto di ricerca?

BUSTA 5

1. Titolarità dei i diritti nascenti dall'invenzione ai sensi dell'art. 65 "Invenzioni dei ricercatori delle università, degli enti pubblici di ricerca e degli istituti di ricovero e cura a carattere scientifico – IRCCS" del Codice della proprietà industriale (Dlgs n. 30/2005)
2. I contratti di ricerca finanziata aventi ad oggetto attività di ricerca innovativa
3. Leggere e tradurre:
"Entrepreneurial processes and methods are experiment-based discovery and co-created actions, spanning organisational borders and involving many complementary competences. In this context, the entrepreneurial process is viewed as a discovery-driven method to address market- and society-related challenges and opportunities by experimentally developing and exploiting intellectual assets into novel and useful values (innovations) for a given set of stakeholders. Such processes and methods require the necessary social-entrepreneurial skills and capacities to facilitate social knowledge spillovers beyond commercialisation. Using open method of coordination of networks, tools and instruments from ERA and the EEA strategic framework will stimulate knowledge valorisation and the development of related skills" *(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)*
4. Come si inserisce una formula in un foglio di calcolo?

BUSTA 6

1. Le Linee Guida MIMIT-MUR per la regolamentazione dei rapporti contrattuali tra le strutture di ricerca e i soggetti finanziatori, di cui al Decreto interministeriale 26 settembre 2023
2. I contratti di ricerca finanziata aventi ad oggetto attività di servizio
3. Leggere e tradurre:
“Intellectual assets” is considered to cover any results, services or products generated by any R&I activities, such as patents, copyrights, trademarks, publications, data, know-how, prototypes, processes, practices, technologies, inventions, software or business models. Widening the scope from a narrow focus on management and protection of IP rights will also broaden the value creation opportunities. Leveraging the full value of intellectual assets generated by R&I activities requires organisations performing R&I activities to manage intellectual assets in a broad sense, both those that can be legally protected, such as patents, copyrights and trademarks and other intellectual assets that could be used in valorisation activities. This requires the development of management strategies and promotion of specific and transversal skills to leverage the full value of intellectual assets generated. Efficient management of intellectual assets is crucial for knowledge valorisation”
(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)
4. Come si impostano i filtri in una tabella di dati?

BUSTA 7

1. Principali novità introdotte dalla Legge n. 102/2023 che modifica il Codice della proprietà industriale (Dlgs n. 30/2005)
2. I contratti di ricerca commissionata aventi ad oggetto attività di sviluppo
3. Leggere e tradurre:
“Entrepreneurial practices, processes, competences and skills, and those that facilitate engagement with citizens, civil society and policy makers, are necessary components of successful knowledge valorisation initiatives. Turning knowledge into novel value, regardless of whether it concerns incremental or disruptive innovations, evidence-based policymaking or wellbeing of citizens, requires proactive/enterprising and co-creation/cross-sectoral engagement attitudes, practices or cultures, combined with entrepreneurial efforts, at some or all stages of the valorisation process. In that way, the valorisation process could inspire adjustments in educational systems and researchers’ careers so that they better cater for the skills, competences and behaviours that would lead to higher creativity and societal value creation. Developing and using entrepreneurial approaches and diversity- and engagement/collaboration-oriented approaches is therefore crucial for valorisation to be effective.” *(from COUNCIL RECOMMENDATION (EU) 2022/2415 of 2 December 2022 on the guiding principles for knowledge valorisation)*
4. Cosa significa “formattare” un testo?
