

This week at GSSI

June 22 – 27

Monday 22 to Thursday 25

Main Lecture Hall

Workshop: *Out-of-the-ordinary - Policy-Making in Cities Facing Extreme Challenges*

Many speakers - See program on www.gssi.infn.it

The history of city is a history of 'shocks' and 'adjustments'. It is also a history 'exogenous shocks' (natural, ecological, economic disaster) but also of 'endogenous shocks' (policy actions aiming at re-inventing different dimension of the city). From a methodological and applied perspective the workshop will explore the cognitive strategies public actors follow in order 'to structure' the policy making process in a 'out-of the ordinary situation'.

Tuesday 23

Main Lecture Hall

Workshop: *FBK - INFN - LFOUNDRY Workshop on SiPM for DarkSide-20k*

Many speakers - See program on www.gssi.infn.it

Workshop on the silicon photosensors for DarkSide-20k hosted by GSSI. The workshop will be participated by representatives from LFoundry and FBK.

Eugenio Coccia and Stefano Ragazzi, Directors of GSSI and LNGS, will open the workshop. The early morning session will be devoted to an introduction of the general framework of cooperation between INFN, LFoundry, and FBK, with Speranza Falciano of the INFN Executive Board describing the cooperative agreement between INFN and LFoundry. Jim Whitmore (NSF) will also be present and will offer a brief statement on his perspective. The late morning will offer an occasion to review the state of the art of the development of SiPM and associated electronics. The afternoon discussions will focus on the requirements for DS-20k and a final round table, moderated by Giovanni Batignani, will help bring the main questions into focus.

Wednesday 24

3 pm; Main Lecture Hall

Seminar: *Latest results and future perspectives of the SOX experiment*

Speaker: Marco Pallavicini, University of Genova and INFN.
